1Touch® Evo3

The 1Touch® biometric locks have evolved into a product line known for their superior fingerprint scanner technology and quality. 1Touch® evo3's cutting edge security is accentuated by unique features and an attractive design. The fingerprint scanner and pin pad is discreetly hidden under a slide cover for protection against harsh weather conditions making the lock perfect for exterior, as well as interior, use. Unlocking the door using the scanner or pin-pad is fast and reliable. Because your time is valuable the simple "DIY" installation takes less than 10 minutes. The 1Touch evo3 was specifically engineered to seamlessly fit into nearly any US standard door preparation. If the lock needs to be moved to a different door, there is not a problem. The 1Touch evo3 comes with reversible handle that flip direction without the needs of any tools.

Three ways to gain access

Opening the door to your home or storage space has never been easier. You can enroll yourself, family, and friends in a few seconds. Enrolled users can be granted door access using a fingerprint, 8 digit pin code, or one of the high security dimple keys that are provided with the lock.

Locking up has never been so easy

The 1Touch makes locking up effortless. When the door is closed it automatically locks behinds you. No need to use a key or pincode to relock the device. The door is always locked and secure.

Knowing who used the lock and when

You have two 1Touch Evo3 versions to choose from. The Audit Trail Capable 1Touch has the option to inform you of who has used the door and when. By purchasing a separate audit trail kit, you will be able to download the access records onto an excel spreadsheet. This valuable information includes who, when, what time, and how the device was unlocked; with either a fingerprint or pin code. This audit trail version holds up to 36 fingerprint users and 78 pin number users.

A high capacity version

If 36 users seem to be too few, don't worry. The High Capacity version accommodates up to 75 fingerprint users and 78 pin code users. This model substitutes audit trail ability for enhanced user capacity. Fortunately both 1Touch models provide a simple way to manage users. You can simply enter a code on the pin pad to add or erase any user, in seconds.
REVERSIBLE HANDLE

NO ADDITIONAL HOLES TO DRILL

3 WAYS TO OPEN: FINGER, CODE, & KEY
INDOOR/OUTDOOR ANSI GRADE 2 QUALITY
