## NEW LARGE BIOMETRIC SAFES by BARSKA®

New to the line of Barska security products is the new large biometric safe. Deep, tall, wide and functional the new large biometric safe by barska is a professional security storage solution. Function is not lost with size, like all Barska safes you can depend on the biometric technology to give you the ability to quickly and effortlessly access your weapons in the time of an emergency. With the new second generation biometric fingerprint technology you can store up to 120 different users. Biometric access to your safe is a must have for home and office security.

With 2.7 cubic feet of storage space you can now have the ability to store large valuable items such as expensive video cameras, laptops, jewelry, passports, documents, cash and more. For you hunters / shooting sports enthusiasts you can now securely store thousands of rounds of ammunition and dozens of handguns. The large biometric safe by Barska features a new manual three point solid dead built locking system that can be quickly opened with one hand turn motion. Access to your valuables is as easy pushing the power button, scanning your fingerprint and a quick turn of the

handle. This large steel safe's interior features two adjustable shelves and a protective floor mat. As a secondary access point the safe comes with two manual keys for backup. Factory pre-drilled anchor points allow you to permanently secure the safe to the floor or wall with the included mounting hardware. Energy efficient the safe can go up to 2 years on only four AA batteries. A secondary rescue battery pack bypass is included which can externally supply emergency power to the safe.
