BioAxxis® ThumbLock®
5 Methods of Access

1. PIN-code Access:
Up to 1,000 pin code users
(PIN codes can be any length)

2. Key Access:
Standard 6-pin rim cylinder
Schlage SC-4 keyway
Easily re-keyed or master keyed

3. Biometric Access:
Up to 1,000 fingerprint users (1:N)

4. High-Security Access:
Enhances security having Users enter either User ID & FP
or User ID & PIN code. This is called 1:1 matching.

5. Emergency:
Hidden 9V battery port
(in case batteries run out)
BioAxxsis® ThumbLock®
5 Methods of Access (cont’d)

• One-of-a Kind Technology
  – Customizable
  – Administrator can set-up each User to be...
    • PIN-code-only
    • Fingerprint-only (1:N)
    • User ID/FP (or PIN) together (1:1)
  – There is no lock on the world market that allows this much flexibility

Audit Trail

• Audit Trail Upgrade (ATU)
  – Includes: Audit Trail software and 1GB Flash Drive

• How It Works
  – 1 flash drive supports all locks in a facility
  – Insert flash drive in bottom of inside unit USB port
  – Download AT records
    • Up to 20,000 records stored in each lock at any time before over-writing
  – MS Access-based AT software provides excellent tracking and is exportable to MS Excel

BioAxxis® ThumbLock®
Access Control

• PC Management Upgrade (PCMU)
  – Includes: Access Control/ Audit Trail software, USB Fingerprint Scanner and 1GB Flash Drive

• How It Works
  – Register all fingerprints (and/or PIN codes) of all users at one centralized PC with the fingerprint scanner
  – Set access control rights at the PC of each individual user to each individual lock
  – When finished, upload those access control rights to the flash drive
  – Bring the flash drive to the lock and program the lock from the flash drive
  – Plus AT records can still be offloaded from the lock to the flash drive
